-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/29/05 has been entered.

### ***Response to Amendment***

2. The applicant's amendments, filed 6/29/2005, have been fully considered and reviewed by the examiner. In light of the amendment to the specification and the claims the objection to such and the 35 USC 112 2<sup>nd</sup> paragraph rejections have been withdrawn. Claims 1-5, 8, 13-14, and 17 remain pending.

### ***Response to Arguments***

3. Applicant's arguments filed 6/29/2005 have been fully considered but they are not persuasive.

The applicant has amended the claims to include the limitation where the drying steps are performed by vacuum drying. The applicant has argued against the WO '491 reference stating the reference teaches of drying the substrate in a pressure chamber and does not teach of a vacuum chamber for drying. The examiner respectfully

Art Unit: 1762

disagrees. WO '491 teaches of drying the solid layer by "reducing the pressure in the drying chamber to below 0.05 bars" to remove the solvent by change the solvent from a solid to a gas (See US 6656527 Column 5, lines 55-62). Therefore, by reducing the pressure below 0.05 bars during the drying, WO '491 teaches of a vacuum drying step.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5, 8, 13-14, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/06491 A1 in view of You et al. (US 6,407,009) and further in view of US Patent 4571486 by Arai et al.

\*\*\* Please note U.S. Patent No. 6,656,527 to Gessner et al. is provided as a working English translation of WO 00/06491 A1 and therefore all references to column and line number are found in 6,656,527. \*\*\*

These claims are rejected for the same reasons as set forth in the office action dated 3/30/2005 and for the reasons set forth in section 3 above.

***Conclusion***
